Lucas PERRIN

lucas.perrin@imt-atlantique.net www.linkedin.com/in/lucasperrin426 07 83 07 05 39

Profile

Final-year student at IMT Atlantique, specialized in optimization and Machine Learning. With experience in data science and research, I am used to handling data, developing models and dashboards, and turning real-world problems into solutions. Curious and autonomous, **I am looking for a 6-month end-of-studies internship starting in April 2027**, as a Data/AI consultant, Data Scientist or AI engineer.

Education

IMT Atlantique (2023 – 2027) Nantes, France

General Engineering Degree — Specialization "Advanced Optimization Methods"

- M2: Operations research, modeling, stochastic optimization, decision support and supply chain
- M1: Data Science, AI, statistics and linear algebra, data processing

Escola Politécnica UFRJ (Feb. – Aug. 2025) Rio de Janeiro, Brazil

Data Science and Computer Engineering courses (academic exchange)

Professional Experience

CEA (March 2026 – Aug. 2026) Saclay, France

Data & Research Internship in Astrophysics

- Machine learning in asteroseismology; development in Python of new implementations for the inversion of the rotation profile of red giant branch (RGB) stars.
- Creation of a complete, functional and published pipeline; co-authored an international scientific paper presenting a new computation technique and presented a poster at TASC10/KASC17 in Denmark.

Gaming Innovation Group (Aug. 2025 – Feb. 2026) Toulouse, France

Data Scientist Internship

- Analysis, dashboard creation (Tableau & Power BI), fraud detection and development of Machine Learning models (revenue prediction, player classification).

KNDS (June 2024 – July 2024) Roanne, France

Operator Internship

- Contribution to the refurbishment of VBCI vehicles; immersion in an industrial environment (design office, production).

Projects

Project commissioned by Exail | *Development of a decision-support interface for resolving production non-conformities*

- End-to-end design of a data application for non-technical users, helping them make decisions when facing production non-conformities
- Data processing, Machine Learning, software development, project organization

Co-development Project | *Detection of satellite AIS communications in the presence of multiple-access interference*

- Signal processing, study of satellite specifications, project management, Matlab, Python

Personal project: Astero Website | Interactive platform introducing asteroseismology to a scientific audience

Skills

Languages: French (native), English (C1 – IELTS 7), Spanish (B1), Portuguese (A2)
Data & Machine Learning: Python, SQL, PyTorch, scikit-learn, statistics & probability, ML / Deep Learning
Data visualization & Web: Power BI, Tableau, Django, HTML
Tools: Generative AI (Claude Code, LLM), Git/GitHub, Linux, Docker (basics), LaTeX

Extracurricular Activities

Communications Manager of the IMT Atlantique Student Union
Sports Manager of Atlanticup 2024: 900 participants, over €25,000 budget
President of the IMT Atlantique Brest football club
Chess teacher – Plouzané chess club
