Lucas PERRIN

lucas.perrin@imt-atlantique.net www.linkedin.com/in/lucasperrin426 07 83 07 05 39

Profile

Final-year student at IMT Atlantique, specialized in optimization, data science and Machine Learning. With experience in data science and research, I am used to handling large volumes of data, developing models and dashboards, and turning real-world problems into solutions. Curious and autonomous, I am looking for a 6-month end-of-studies internship, starting in April 2027.

Education

IMT Atlantique (2023 – 2027) Nantes, France

Engineering Degree — Specialization "Advanced Optimization Methods"

- M2: Flow modeling, operations research, stochastic optimization and industrial logistics
- Additional modules: Data Science, big data processing and decision support

Escola Politécnica UFRJ (Feb. – Aug. 2025) Rio de Janeiro, Brazil

Data Science and Computer Engineering courses (academic exchange)

Professional Experience

CEA (March 2026 – August 2026) Saclay, France

Data & Astrophysics Research Intern

- Machine learning applied to asteroseismology; development in Python of new implementations for the inversion of the rotation profile of red giant branch (RGB) stars.
- Built and published a complete, functional pipeline; co-authored an international scientific paper presenting a new computational technique and presented a poster at TASC10/KASC17 in Denmark.

Gaming Innovation Group (August 2025 – February 2026) Toulouse, France

Data Scientist Intern

- Analysis, dashboard creation (Tableau & Power BI), fraud detection and development of Machine Learning models (revenue forecasting, player classification).

KNDS (June 2024 – July 2024) Roanne, France

Operator Intern

- Contribution to the refurbishment of VBCI vehicles; immersion in an industrial environment (design office, production).

Projects

Project commissioned by Exail | *Development of a decision-support interface for resolving production non-conformities*

- Designed an end-to-end data application for non-technical users, to help them make decisions when facing production non-conformities
- Data processing, Machine Learning, software development, project management

Co-development Project | *Detection of satellite AIS communications under multiple-access interference*

- Signal processing, study of satellite specifications, project management, Matlab, Python

Skills

Languages: French (native), English (C1 – IELTS 7), Spanish (B1), Portuguese (A2)
Data & Machine Learning: Python, SQL, PyTorch, scikit-learn, statistics & probability, ML / Deep Learning
Data Visualization & Web: Power BI, Tableau, Django, HTML
Tools: Generative AI (Claude Code, LLMs), Git/GitHub, Linux, Docker (basics), LaTeX

Extracurricular Activities

Communications Officer of the IMT Atlantique Student Union
Sports Manager of Atlanticup 2024: 900 participants, over €25,000 budget
President of the IMT Atlantique Brest football club
Chess teacher – Plouzané chess club
