# Lucas PERRIN

lucas.perrin@imt-atlantique.net www.linkedin.com/in/lucasperrin426 +33 7 83 07 05 39

## Profile

**Final-year student at IMT Atlantique**, specialized in optimization and Machine Learning. With experience in data science and research, I am used to handling data, developing models and dashboards, and turning concrete problems into solutions. Curious and autonomous, **I am looking for a 6-month end-of-studies internship starting in April 2027**, as a Data/AI Consultant, Data Scientist, or any other role involving AI and optimization.

## Education

**IMT Atlantique** (2023 – 2027) Nantes, France

*General Engineering Degree (Master's level) — Specialization "Advanced Optimization Methods"*

- M2: Operations research, modeling, stochastic optimization, decision support and supply chain
- M1: Data Science, AI, statistics and linear algebra, data processing

**Escola Politécnica UFRJ** (Feb. – Aug. 2025) Rio de Janeiro, Brazil

*Data Science and Computer Engineering courses (academic exchange)*

## Professional Experience

**CEA** (March 2026 – August 2026) Saclay, France

*Data & Astrophysics Research Internship*

- Machine learning in Asteroseismology; Python development of new implementations for the inversion of the rotation profile of red giant branch (RGB) stars.
- Built a complete, functional and published pipeline; co-authored an international scientific article presenting a new computation technique and presented a poster at TASC10/KASC17 in Denmark.

**Gaming Innovation Group** (August 2025 – February 2026) Toulouse, France

*Data Scientist Internship*

- Analysis, dashboard creation (Tableau & Power BI), fraud detection and development of Machine Learning models (revenue prediction, player classification).

## Projects

**Research project for LS2N** | *Evaluation and Hybridization of SSNDP Formulations*
- Implementation of formulations and search for improvements to the Scheduled Service Network Design Problem for freight transport network planning

**Project for INRIA** | *Meshcore Repeater Planning Tool*
- Development of a platform suggesting optimal locations for LoRa repeaters in order to plan Meshcore mesh networks

**Project commissioned by Exail** | *Development of a decision-support interface*
- Design of an application helping workers make decisions on production non-conformities: data processing, Machine Learning, software development and project organization

**Personal project: Website Astero** | *Interactive platform introducing asteroseismology to a scientific audience*

## Skills

**Languages**: French (native), English (C1 – IELTS 7), Spanish (B1), Portuguese (A2)
**Machine Learning & AI**: Python, PyTorch, ML / Deep Learning, LLMs & generative AI, statistics & probability
**Optimization & Operations Research**: PuLP, Gurobi, MILP, mathematical modeling, stochastic optimization
**Tools & Research**: Matlab, SQL, Git/GitHub, Linux, LaTeX, Docker (basics)

## Extracurricular Activities

**Communications Manager** of the IMT Atlantique Student Union
**Sports Manager** of Atlanticup 2024: 900 participants, over €25,000 budget
**President** of the IMT Atlantique Brest football club
**Chess teacher** - Plouzané chess club
